Subject: Installation of additional propane tanks at 11 School Road

Please be advised that an application for a Site Plan Approval has been submitted to the Andover Planning and Zoning Commission for the installation of additional propane tanks at 11 School Road. Essentially, the proposed tanks would be installed adjacent to the existing tanks. The new tanks would serve the Town Office Building as well as the Fire Safety Complex. The Site Plan review involves a standard 57 point checklist of items which may warrant review. This checklist includes your review and comment on the application, which is available on line with active applications before the Planning and Zoning Commission. The matter is slated to be on the agenda for their 11.21.23 meeting. Your review and comment by that time would be greatly appreciated.

Thank you.

Jim Hallisey
Zoning Agent
