

9.7.2023

William Genovese

Christian Lane

Dear Mr. Genovese:

Thank you for taking the time to meet with me on site to view the property and discuss my concerns relative to the disparities between existing conditions and the approved plan. My remaining concerns are largely the same as stated previous; 1) the finished plan call for the placement and spreading of loam; and 2) the seeding has not taken as would be expected had the topsoil been spread and 3) the direction of stormwater from the side is not consistent with the modified/approved plan, a copy of which is attached. Any deviation from the approved plan would require the Commission's approval. The Planning and Zoning Commission meets next on the evening of September 19, 2023. The meeting is being held as a hybrid – in person and via a web-based platform.

Please feel free to contact me at 860.742.

Thank you for your attention to this matter

Sincerely,

Jim Hallisey
Zoning Agent
