

IWWC #20-30 Application, 25 Cider Mill Rd, Klayman

Description of Curtain Drain- Submitted by applicant on 10-27-2020

Curtain drain:

The drain will be installed to drain away water build up from the hill sloping on the western side towards the house foundation. The house is built on a slab foundation with no basement.

The trench will be approximately 24' long 1' wide and 2' deep.

The trench will be filled with drainage gravel and a 4" perforated plastic tube with landscape fabric.

The drain will run alongside the western side of the house and daylight into the slope past the end of the house where it will run into a natural swale which runs away from the house on the north side.
