Perkins\_wall\_application.pdf;

This email is to inform you that the ALMA board has approved your request to repair the wall along the lake at 1 Lakeside Drive as detailed in the attached application. The approval is contingent on the IWWC accepting the mortar proposed for use in the application. ALMA will allow it in this application due to your proximity to the current in the cove.

Please note, the lake has been lowered to our normal winter level and will not be lowered any further. We will raise the lake to its summer level approximately the third weekend in March unless there is still ice on the lake in which case it will be raised when all of the ice is gone. Please plan the work so that it is completed accordingly.

If you have any questions please don't hesitate to contact me.
