Final-Plan.pdf; Flat-FieldstoneWall-Picture.pdf;

Gary,

The plans for the stone wall presented in the attached documents are consistent with what we would expect on the lake and are acceptable to ALMA.

I will try to attend the meeting this evening in case there are any questions.

Subject: Stone Wall 3 Lakeside

Hi Jeff,

There has been a number of threads going on here with different distributions So I wanted to be sure you were up to date

Attached is the revised plan for the stone wall on 3 Lakeside. There has been confusion because of the reference to using rip-rap to build the wall. The intent is to use field stone - an example is attached. The plan (attached) that the wetlands commission will review on Monday has been revised to reference flat field stone instead of rip-rap.

Joe suggested that we run this through ALMA again so that we are all on the same page. Perhaps an email from ALMA stating this material is OK is required? Jeff is it possible to have that approval email by Monday?

Joe - I noticed that in the final plan there is still reference to rip-rap. Look in the bottom right hand corner. Can you update please?

Thanks in advance.

Gary
