Gary,

[REDACTED]

For new docks and walls there is a process that needs to be followed for building or rebuilding these that includes both ALMA and the Wetlands commission. The ALMA information is [Here](#). The Wetlands commission requires review and approval of anything within 200 feet of the lake and you can find information on the link I sent in my previous email or the town website. These are regarding building or repairing docks, removing a dock would not require ALMA involvement but please be aware that we do not allow machinery in the lake bed so it would need to be removed manually.

If you have any other questions please let me know.

Jeff Hays

Vice President, ALMA
