

IWWC 22-11 Andover Lake (ALMA)- Map of Proposed Hydro-Raking

Submitted on 9/5/2022

Map Description- taken from email from J. Hays to Agent on 9-5-2022

-You will note that I have marked the areas in yellow for Lilly pads and pink for the cattails.

-It is a relatively small area less than 1 acre of the lake that will be affected.

-I used the same picture that we used for the herbicide treatment which explains the green background, however it is not pertinent for this treatment but used for convenience only.
