Hello Michael,

You and I spoke last Wednesday about my team's commercial development at 580 Lake Road being submitted to Planning & Zoning for Site Plan Review today. One of the requirements for submitting the application is stated below:

"Copy of a request for review and approval by the Fire Marshal water approval supply for fire protection."

I still have not been able to get in contact with anyone in the Town to get more information on this requirement and was wondering if you by chance have spoken with anyone about it? Currently, we do not have most of the architectural plans and details that you said you would need in order to conduct your review. Typically our architect trails behind us as we obtain the required land development permits. I am hoping that for the time being our Civil Site Plan and Truck Turn Plan will be sufficient for Planning & Zoning's purposes. I have attached PDFs of these two plans – please let me know if you need paper copies as well.

Please let me know what you think and if you have any more information.

Thank you,

Zachary T. Ziemba, EIT
