

Narrative

c. Grading operations will consist of:

- and

3. Design criteria, details and procedures
 1. The sediment basin was designed using the method utilized in the "Ct. Guidelines for Soil Erosion and Sedimentation Control 2002 Edition", "HydroCad Stormwater Program" with return storm frequency of 5 years was used to compute runoff volume.
 2. All design details are shown on sheet 2 of 2.
 3. Procedures are outlined in the Sequence of Construction on sheet 2 of 2.
